Compare quality, reliability and versatility and you'll find there is NO EQUAL to Utility Refrigerator. Whatever your requirements, Utility can offer a standard model or a custom product that will more than meet your needs. At Utility we do not just build products... we offer solutions.

JUST A FEW OF OUR STANDARD FEATURES

- Integral, one-piece stainless steel door handle, guaranteed for life of unit.
- Center locking doors with easy to reach locks increase security.
- Light switch concealed in door hinge to prevent breakage.
- One-piece stainless steel grill: easy to remove, easy to clean.
- Welded and polished liner corners provide tighter seal and are more sanitary.
- Corrosion resistant, heavy duty stainless steel shelf clips and standards allow shelves to support heavier weights.
- Threaded shelf standard inserts permit easy removal of interiors for cleaning, without the need for tools.
- 2 1/2" high density insulation throughout exceeds industry standard, increases strength of box and results in greater energy efficiency.
- Sight glass and removable filter drier standard on all models for quick and easy diagnosis without the need for expensive test instruments; protects and increases life of refrigeration system.

LOW HEIGHT REFRIGERATORS AND FREEZERS ALSO FEATURE:

- Reinforced sub-tops capable of supporting heavy restaurant equipment.
- Specially insulated tops for efficient cooling when used with cooking equipment.
